# Rutkuli

Freelance Developer

## Summary

Hey, my name is Jimi, and I am a Freelance Developer from Finland with a lot of passion for developing applications.

## Work Experience

### Developer, RustNeptune, Europe

July 2021 - Present

– Designed and developed a frontend and backend for a Rust gambling site.

### Developer, rustylake.xyz, Europe

January 2021 - September 2021

– Designed and developed a web based authentication system, that allowed players to authenticate their accounts using all kinds of OAuth (authentication) services.

### Developer, crystalrust.net

December 2020 - Present

– Designed and developed a versatile web based authentication system, that allowed players to authenticate their accounts using OAuth (authentication) services like steam and discord.

### Developer, hexbot (Self-Employed), Finland

September 2020 - Present

– Designed and developed a multifunctional Discord bot, which has over 60+ commands and web dashboard. You can add custom commands, moderate your server, do giveaways and more! Our bot has Auto role and auto moderation.

### Versatile Obfuscator Discord bot (Self-Employed)

March 2019 - Present

– Developed obfuscator Discord bot, that was able to encrypt multiple programming language files without the files ever going to be physically processed in the server itself.

## Hobbies

At the moment I don't have any additional hobbies because I mostly spend my time for studying and programming.
